AEROSPACE TECHNOLOGY
A.S. DEGREE PROGRAM
APPLICATION

Revised June 2014
The Aerospace Technology Program anticipates close working relationships with NASA, DOD, and their contractors that establish specific requirements to be met by all employees. Please review and initial each item, then sign this form to indicate your understanding and acceptance.

**Drug-free Workplace.** The aerospace workplace is a drug-free workplace; drug testing is required as a condition of employment. You may be required to undergo an unannounced drug test as part of your internship in the Aerospace Technician Program. Failure to pass a drug test may result in expulsion from the Aerospace Technician Program.

**U.S. Citizenship.** The aerospace industry requires U.S. citizenship to access the workplace. You must be a U.S. citizen to be eligible for admission to the Aerospace Technician Program.

**Security Clearance.** In some instances, you will be required to obtain a security clearance that requires an extensive background investigation. You must agree to undergo a background check.

**Manual Dexterity.** The Aerospace Technician Program requires the use of tools, equipment, chemicals, and access to confined spaces and heights that demand physical capabilities for safety. You must possess basic manual skills and may be asked to undergo a manual dexterity test.

**Accident/Health Insurance.** There are inherent workplace hazards in the Aerospace Technician Program that require the purchase of accident/health insurance. All students must provide or purchase accident/health insurance to be eligible for the program. Proof of accident/health insurance at registration is mandatory.
