

Get moving on a New Career Path

Register for Fall 2021 classes

Eastern Florida State College's Transportation and Logistics A.S. degree emphasizes the role of logistics as an integrated part of Supply Chain Management through courses on information systems, transportation, warehouse management, distribution, international logistics and logistics management.

Students will develop basic and cross-functional skills in logistics, inventory, planning, procurement, organization, delivery flow and distribution of goods and services that can be applied to a **wide-range of logistics related careers**. The curriculum also teaches basic management, accounting, business and economic principles.
